SUMMARY

Fourth-year Software Engineering student in Istanbul who builds responsive, accessible websites with clean HTML, CSS and JavaScript. Six WordPress websites delivered for real clients and a front-end internship. Now learning React and back-end basics, and looking for a first front-end developer role.

EDUCATION

Altınbaş University, Istanbul — Expected graduation 2027

B.Sc. Software Engineering (taught in English)

Coursework: algorithms and logic, software requirements, object-oriented programming (Java), software testing and validation.

EXPERIENCE

Front-End Development Intern — 2026

Ajax Gold and Metal Detectors

- Built a responsive portfolio website as the internship project.
- Applied semantic HTML, CSS Grid, Flexbox and responsive design principles.
- Worked under senior developer guidance and improved front-end development skills.

WordPress Developer (client projects) — 2023 – present

- Delivered 6 websites for real clients using WordPress.
- Designed and built each site, covering layout, colour and visual design.

PROJECTS

Personal Portfolio Website (Next.js, TypeScript) — 2026

- Trilingual site (English, Turkish, Arabic with right-to-left layout) with light and dark themes, built with Next.js, React and TypeScript.
- Responsive on all screen sizes; accessibility checked with axe-core with no violations; static pages with SEO metadata and structured data.
- Contact and booking forms backed by a server route with validation, spam protection and rate limiting.
- Automated checks for translations and key pages, run on every push with GitHub Actions.

SKILLS

Front-end	HTML5, CSS3 (Grid, Flexbox), JavaScript, responsive and accessible design
Languages	C, C++, Java, Python
Tools	Git, GitHub, WordPress, VS Code, Figma, Hostinger
